REFRESHER TRAINING
for Electrical Equipment in Hazardous Areas
Course No 23757

Background

Australian standard AS/NZS 60079.14 Electrical equipment for explosive atmospheres require that the design, construction, maintenance, testing and inspection of installations covered by these Standards shall be carried out only by competent persons. The competent person's training must include instruction on the various types of protection and installation practices, relevant rules and regulations and on the general principles of area classification. It is a requirement of Australian Standard AS/NZS 60079.14 to have appropriate continuing education or training and this should be undertaken by personnel on a regular basis. The Standards and regulations are constantly changing with regard to the requirements for explosion-protected electrical equipment and installations.

Who Should Attend?
The refresher is for people who have an understanding of the requirements for Electrical Equipment in Hazardous Areas.

Program

- Selection, installation, maintenance, testing and inspection of electrical equipment in Hazardous Areas.

Course Outcomes
