

## Connecting to the TAFENSW Wi-Fi Network Mac OSX Devices

*You must have your TAFE Portal username and password*

1. Select the **wireless icon** -  
found in the top right hand corner of the screen

2. Select **TAFENSW** from list of networks

**TAFENSW**

3 When prompted for network credentials enter your **TAFE Portal Username and password**

Username:	firstname.lastname1
Password:	*****

4 Tick **Remember this network** and then click on **Join**

<input checked="" type="checkbox"/> Remember this network
---

5. Click on **Continue** when the authentication prompt appears

*If required,* enter your local administrator **username and password** and then click on **Update Settings**

6. Select the **wireless icon** at top of screen.

7. Select **Open Network Preferences...**

8. Click **Advanced** and select **Proxies** tab

9. Make sure **Auto Proxy Discovery** is checked and click **OK**.

10. Click **Close**.

11. You should now be connected to the TAFENSW network - open your browser to access the Internet.

If you cannot connect, please ask your local TAFE NSW Library Staff
