Library and Information Services

How to preview and recommend vLearn Online Videos

Library and Information Services provides access to a number of online video programs from Video Education Australasia (VEA), via their vLearn video streaming service.

The video streaming service allows users (current Illawarra Institute students and staff) to view these programs from any networked or wireless device (e.g. computer, laptop, smartphone).

If you would like to recommend a program that is currently not part of the annual subscription, please email us. You might also want to follow the instructions below to preview a vLearn program on the VEA website.

Note: Recommendations will be considered at the end of each annual subscription period in April. As we cannot accommodate all requests, please limit your recommendations to programs that would be used by your staff and students both on and off campus, e.g. where a physical DVD for loan would not meet this demand.

How to preview vLearn programs:

1. Go to www.vea.com.au (NB No need to log in)
2. Click on vLearn (in left hand column).
3. Select your Market (TAFE / RTO – at top of page, then Australia)
4. Do a keyword search on your topic or browse through the subject catalogues (left hand column).
5. Your results list should look similar to this. Click on a title for more information and to preview the program.
