Connecting to the TAFENSW Wi-Fi Network

Mac OSX Devices

You must have your TAFE Portal username and password

1. Select the wireless icon - found in the top right hand corner of the screen

2. Select TAFENSW from list of networks

3. When prompted for network credentials enter your TAFE Portal Username and password

4. Tick Remember this network and then click on Join

5. Click on Continue when the authentication prompt appears

   If required, enter the local administrator * username and password and then click on Update Settings. *e.g. Your own computer username and password if you have one

6. Select the wireless icon at top of screen.

7. Select Open Network Preferences...

8. Click Advanced and select Proxies tab

9. Make sure Auto Proxy Discovery is checked and click OK.
   Click Close.

10. You should now be connected to the TAFENSW network - open your browser to access the Internet.

If you cannot connect, see the Wi-Fi Troubleshooting guide.

Some social media chat apps are blocked from TAFE NSW Wi-Fi network.
